**Sunday February 12th**

Please register to become a bone marrow donor for Briana or anyone waiting for a match. With only one swab from your cheek, you can save a life.

On January 2016, Briana was diagnosed with Acute Myeloid Leukemia (AML). After spending 8 months in the hospital, intensive chemotherapies and one bone marrow transplant, Briana was declared in remission. Unfortunately, Briana relapsed early November 2016 when she developed a few tumors that led to radiation and more chemotherapy. She is now in desperate need of a compatible match to do another bone marrow transplant to save her life.
